

Prof. Agnes Klar

Agnes Klar obtained her MSc in Biological Sciences from the University of Konstanz in 2009, her PhD from the University of Zurich (UZH) in 2014, and completed her habilitation at UZH in 2019. She is a group leader at the Tissue Biology Research Unit, University Children's Hospital Zurich, specializing in skin tissue engineering, particularly wound healing and stem cell biology. Dr. Klar contributed to the development of a patented autologous skin substitute currently in Phase III clinical trials for burn injuries and leads several innovation projects focused on dermo-epidermal skin grafts.
